Lead Editor: Steve Anglin
Technical Reviewers: Thomas Marrs and Matthew Moodie
Editorial Board: Steve Anglin, Dan Appleman, Ewan Buckingham, Gary Cornell, Tony Davis, John Franklin, Jason Gilmore, Chris Mills, Steve Rycroft, Dominic Shakeshaft, Jim Sumser, Karen Watterson, Gavin Wray, John Zukowski
Project Manager: Tracy Brown Collins
Copy Edit Manager: Nicole LeClerc
Copy Editor: Kim Wimpsett
Production Manager: Kari Brooks
Production Editor: Kelly Winquist
Compositor: Diana Van Winkle, Van Winkle Design Group
Proofreader: Nancy Sixsmith
Indexer: Bill Johncocks
Artist: Diana Van Winkle, Van Winkle Design Group
Cover Designer: Kurt Krames
Manufacturing Manager: Tom Debolski

Contents

About the Authors ..... *xxi*
About the Contributing Authors ..... *xxiii*
About the Technical Reviewers ..... *xxv*
Acknowledgments ..... *xxvii*

Chapter 1 Introducing and Installing J2EE 1.4 ..... *1*

Installing the J2EE 1.4 SDK *2*
Testing the J2EE 1.4 SDK Installation *5*
Starting the J2EE Server *5*
Compiling and Deploying "Hello World" *6*
Summary *18*

Chapter 2 Understanding Web Applications *21*

Introducing N-Tier Structure *22*
Dynamic vs. Static Content *23*
Understanding Web Components *24*
Servlets *25*
JSP Pages *31*
Introducing the MVC Design Pattern *34*
The Model *34*
The View *35*
The Controller *35*
General Application Flow Using MVC *36*
MVC and Separation *38*
Understanding Containers *38*
Choosing Your Application Server *40*
Prioritizing Your Application's Features *41*
Packaging Web Applications *42*
Web Application Structure *43*
JAR Files *45*
WAR Files *47*
EAR Files *47*
Understanding Protocols *48*
HTTP *49*
HTTPS *53*

HTTP/SOAP 53
JRMP 55
RMI/IIOP 55
Introducing Web Application Architecture 56
Application Considerations and Concerns 57
Architecture vs. Configuration 58
Exploring Application Scenarios 59
Using Naming Conventions 60
Using Deployment Descriptors 62
Understanding Data Store Interaction with Web Components 64
Addressing Portability Concerns 65
Supported JDKs 65
Different Application Vendors 65
Tips for Maintainability Concerns 66
Tips for Performance Concerns 67
Choice of JVM and JIT Options 67
Java Heap Size and Garbage Collection 67
Sessions 68
Handling Data Transfer 69
Summary 70

Chapter 3 Working with JSP 2.0 73

Introducing JSP Technology 73
Introducing JSP 2.0 74
Understanding the Page Life Cycle 74
JSP Documents 76
JSP Document Syntax 78
A Simple JSP Document 78
HTTP 79
HttpJspPage Interface 80
Introducing JSP Syntax and Usage 81
General Rules of Syntax 81
JSP Elements 82
Available Object Scope 107
Implicit Objects 109
Scripting Elements 110
Comments 111
The JSP 2.0 Expression Language 112
Handling Errors 119
Internationalization of JSP Pages 121
Debugging 122
Performance 123

Using JSP Best Practices 125
Eliminate Using Scriptlets 126
Use the MVC Pattern and Frameworks 126
Place Business Logic in JavaBeans 127
Use Existing Custom Tag Libraries 127
Use Custom Actions 127
Template As Much As Possible 128
Use the Correct Inclusion Mechanism 128
Use Common Configuration Settings When Possible 128
Be User-Friendly, and Use the JSP Exception Mechanism 129
Be Page Author–Friendly, and Use JSP Comments 129
Take Advantage of Validation 130
Make Your Pages Readable 130
Summary 130

Chapter 4 Using the JSTL 131

Why a JSP Standard Tag Library? 131
Why Now? 132
Why You Really Want to Use the JSTL 132
Understanding the Need for Encapsulation 133
Getting the JSTL 133
Making Life Easier: JSTL in Action 133
Getting a JSTL Functional Overview 134
Core 135
XML 135
Internationalization and Formatting 136
SQL 136
JSTL Descriptor Files 137
Understanding JSTL Basics 137
Scoped Variables 137
var and scope Attributes 138
Variable Visibility 138
Dynamic and Static Attributes 138
Handling Errors and Exceptions 139
Action Body Content 140
Understanding Configuration Settings 141
Configuration Variables 143
The Config Class 144
Using the Core Tag Library 144
General-Purpose Actions 145
Conditional Actions 146
Iterator Actions 148
URL-Related Actions 152

Working with the XML Core Actions *155*
Getting to Know XPath *155*
Accessing Resources *158*
Using the select Attribute *159*
<x:out> Action *159*
<x:set> Action *160*
<x:parse> Action *160*
XML Flow Control Actions *161*
Using XML Transformation Actions *163*
<x:transform> Action *164*
<x:param> Action *164*
Using Internationalization Actions *165*
Using the <fmt:message> Action *165*
Working with Localization Context *166*
Setting Preferred Locales *167*
Setting the Preferred Locales *167*
Formatting Locales *168*
How Resource Bundle Are Decided *169*
Resource Bundle Lookup Samples *171*
Using the LocaleSupport Class *171*
Encoding the Client Response *172*
Locale and Resource Bundle Actions *173*
Formatting Actions *176*
Using the SQL Actions *182*
Working with the Data Source *183*
Configuring a Data Source *184*
Using a Data Source *185*
Using the maxRows Configuration Setting *186*
Using Interfaces and Classes *186*
Result Interface *186*
SQLExecutionTag Interface *187*
ResultSupport Class *188*
Using the SQL Actions *188*
<sql:setDataSource> Action *188*
<sql:query> Action *189*
<sql:update> Action *191*
<sql:transaction> Action *191*
<sql:param> and <sql:dateParam> Actions *193*
When to Use JSTL Actions *193*
Summary *194*

Chapter 5 Using Custom Actions in JSP 2.0 195

Deciding When a Custom Action Is Needed 196
Using Classic Custom Actions 197
The Tag Interface 197
Other Interfaces 198
Understanding Custom Action Life Cycles 199
Tag Life Cycle 199
Attributes 202
IterationTag Interface 204
BodyTag Interface 208
Using Classic Custom Actions 213
Tag Handler Properties 214
How Tag Handlers Deal with Empty and Nonempty Actions 214
Defining a TLD 215
Using the <taglib> Element 216
Using the <tag> Element 217
Defining a Tag 218
The <function> Element 219
The <listener> Element 221
The <tag-file> Element 221
The <taglib-extension> and <tag-extension> Elements 222
Understanding Tag Files 222
Tag Files 223
JSP Fragments 224
Exploring Tag Files in Detail 226
Syntax 226
Tag File Sample 228
simpletag.jsp 230
XML Syntax of a Tag File 231
Packaging Tag Files 236
Using Simple Tag Extensions 239
SimpleTag Interface 240
Simple Tag Handler Life Cycle 241
Working with Dynamic Attributes 243
Building a SimpleTag Handler with Dynamic Attributes 244
Do You Need a TagAdapter? 249
Using a Tag Library Validator Class 249
Defining the Validator Class 251
The <validator> TLD Entry 254
Validating a JSP Page 255
Summary 257

Chapter 6 Working with Servlets 259

Introducing Servlet 2.4 260
Introducing Servlets and the MVC Pattern 260
Introducing the javax.servlet Package 261
The javax.servlet Interfaces 263
The javax.servlet Classes 265
The javax.servlet Exception Classes 266
Introducing the Servlet Interface 266
The Life Cycle of a Servlet 267
Obtaining Initialization Parameters 268
Servlet Threading Issues 268
Efficient Servlet Lifecycle Management 269
Obtaining Information About a Servlet 269
Introducing the GenericServlet Class 269
Lifecycle Methods 270
Servlet Environment Methods 270
Utility Methods 271
Introducing HTTP and Servlets 272
The HttpServlet Class 273
The ServletRequest Interface 276
The ServletResponse Interface 284
HTTP Requests and Responses 290
Understanding the Request/Response Cycle 298
Request/Response Interfaces and Wrapper Classes 298
Implementing the RequestResponseServlet 298
Input and Output Streams 302
The ServletInputStream Class 303
ServletOutputStream Class 304
Introducing Servlet/Container Communication 305
Implementing ContainerServlet 305
The ContainerServlet 307
The ServletConfig Interface 308
The ServletContext Interface 309
Introducing the ServletContext 316
Understanding the Deployment Descriptor 316
An Example Deployment Descriptor 318
Servlet Context Initialization Parameters 322
Servlet Definitions and Mappings 323
Servlet Mappings 324
Session Configuration 325
Filter Definitions and Filter Mappings 325
Listeners 326

Using Error Pages 327
Welcome Pages 329
Introducing File-Based Security 330
HTTP Authentication 330
Defining Users in Tomcat 332
Introducing the ServletContext Lifecycle Classes 332
The ServletContextEvent Class 333
The ServletContextAttributeEvent Class 333
The ServletContextListener Interface 333
The ServletContextAttributeListener Interface 334
The ServletRequestEvent Class 334
The ServletRequestListener Interface 334
The ServletRequestAttributeEvent Class 334
The ServletRequestAttributeListener Interface 335
Introducing Additional Interfaces 336
Threading and the SingleThreadModel Interface 336
The RequestDispatcher Interface 336
Using Filters and the Request Dispatcher 341
Introducing Servlet Exception Classes 342
The ServletException Class 343
The UnavailableException Class 343
Handling Listener Exceptions 344
Introducing Servlet Best Practices 344
Take Advantage of contextInitialized() and init() 345
Pick a Framework That Implements a Controller 345
Cache Static and Dynamic Data 345
Optimize service() 346
Control Thread Pool 347
Summary 348

Chapter 7 Using Advanced Servlet Features 349

Understanding the Stateless Nature of HTTP 350
Why Track Client Identity and State? 351
How Do You Maintain Sessions? 351
Session Tracking Using URL Rewriting 352
Session Tracking Using Cookies 356
Working with Cookies in Servlets 357
Session Tracking Using Hidden Form Fields 362
Session Management Using the Servlet API 365
The HttpSession Interface 366
Session Tracking Performance Considerations 369
Implementing Session Management 370

Listening for Session Lifecycle Events 382
Advanced Session Handling 387
Working with Filters 390
What Is a Filter? 390
Prototyping New Functionality 391
Adding New Functionality 392
Understanding Filters 392
The Logical View of a Filter 392
The Physical View of a Filter 394
Configuring Filters 396
Defining Filters 396
Mapping Filters 397
Chaining Filters 398
Using Filters 399
A Logging Filter 400
A XSLT Transformation Filter 404
Chaining Filters 411
Summary 413

Chapter 8 Handling Security in the Web Tier 415

Understanding the Java 2 Security Model on the Server 416
Understanding Server-Side Policy Files 417
Using Server-Side Policy Files 418
Implementing Secure Socket Layer 421
Understanding the SSL Operation Model 422
Enabling SSL on Tomcat 5 427
Setting Up Servlet 2.4 Security 432
Understanding Access Security and J2EE Business Logic 434
Setting Up Security with Tomcat 5 434
Setting Up Container-Managed Security 437
Understanding Methods of Authentication 439
Using Declarative Security 440
Using a MemoryRealm 440
Using Form-Based Authentication 442
Using Digested Passwords 446
Using a JDBCRealm 447
Using Multiple Authentication Requests 450
Using Single Sign-On 453
Logging Out of an Application 454
Setting Up Programmatic Security 455
Summary 457

Chapter 9 Building the Best Application You Can.....459

Why Is Good Application Design Important?.....460
Maintainability.....460
Reusability.....461
Extensibility.....461
Symptoms of Poor Application Design.....462
Understanding J2EE Web Application Design.....463
Introducing Model 2 Architecture.....463
Benefits of Model 2 Architecture.....464
Using Other J2EE Components in Model 2 Architecture.....465
Component Roles in Model 2 Architecture.....467
Documenting Design Principles.....467
Using Design Patterns.....468
J2EE Patterns.....468
Why Use Patterns?.....468
Creating an Online Auction.....469
Stating the Requirements.....469
Understanding the Entities Within the Domain Model.....470
Building the Online Auction Using Model 2 Architecture.....470
Using the Front Controller Pattern.....471
Viewing the Responses.....480
Processing the Login.....481
Adding a New Response.....482
Processing a New Response.....482
Deleting an Existing Response.....483
Using the Intercepting Filter Pattern.....484
Using the View Helper Pattern.....488
Using the Service to Worker Pattern.....491
Refactoring Applications.....492
Summary.....493

Chapter 10 Using Session Beans.....495

Introducing the Remote and Local Client Views.....495
Introducing the Session Bean State.....497
Using the Session Bean Client View.....498
Introducing the Home Object.....499
Looking Up the Home Object.....499
Introducing the Remote Home Interface.....500
Using the Remote Component Interface.....501
Introducing the Local Home Interface.....502
Using the Local Component Interface.....503

Implementing the Session Bean Component Contract *504*
Create Methods *506*
Activation and Passivation *508*
Session Context *509*
SessionSynchronization *510*
Understanding the Session Bean Requirements *511*
Session Bean Artifacts *511*
Session Bean Class *512*
ejbCreate Methods *512*
Business Methods *513*
Remote Component Interface *513*
Local Component Interface *514*
Remote Home Interface *514*
Local Home Interface *514*
Understanding the Session Bean Deployment Descriptor *515*
Summary *516*

Chapter 11 Introducing Entity Beans and Persistence *517*

What Are Entity Beans? *517*
Understanding the Changes in J2EE 1.4 ..... *518*
Introducing the Bean *518*
Constructing an Entity Bean *518*
Lifecycle Methods *525*
Activation and Passivation *530*
The Primary Key *531*
The Finder Methods *533*
The Select Methods *535*
Introducing Container-Managed Persistence (CMP) *536*
CMP Fields *537*
Container Manager Relationships (CMR) *537*
EJB Query Language (EJB QL) *540*
Introducing Bean-Managed Persistence (BMP) *547*
Database Connection *547*
Lifecycle Methods *548*
Finder Methods *553*
The Complete Bean *555*
Deployment Descriptors *561*
Persistence in the Deployment Descriptors *562*
Using Entity Beans *563*

Footnotes *565*
Caching *565*
Reentrancy *568*
Summary *569*

Chapter 12 Introducing Messaging *571*

Introducing JMS Architecture *573*
Understanding Messaging Styles *575*
Using Connection Factory *575*
Understanding Destinations *577*
Using Connections *579*
Connection State *580*
Connection Metadata *581*
Exception Listeners *582*
Client Identifiers *582*
Using Sessions *583*
Creating Sessions *584*
Creating Message Domain–Specific Sessions *591*
Using Message Producers and Consumers *592*
Message ID *592*
Message Time Stamp *592*
Message Priority *593*
Delivery Mode *593*
Time to Live *593*
Sending Messages *594*
Receiving Messages *596*
Understanding Messages *596*
Message Structure *596*
Message Header *598*
Using JMS in Request/Response Paradigm *600*
Message Body *604*
Message Properties *606*
Message Selectors *607*
Understanding Message-Driven Beans *608*
MDB Overview *608*
MDB Component Contract *609*
Message-Driven Context *612*
Deployment Descriptor *613*
Introducing Message Linking *616*
MDBs and Transactions *620*
MDBs and Security *620*
Summary *620*

Chapter 13 Using EJB Container Services 621

Introducing Security 621
Defining Security Roles 624
Defining Method Permissions 625
Specifying Methods 627
Programmatic Security 629
Run-As Identity 632
Mapping Roles to Principals 634
Introducing Scheduling 635
TimerService 636
TimedObject 638
Introducing Transactions 640
EJB Transactions 641
Container-Managed Transaction Demarcation 642
Rolling Back Transactions 644
Bean-Managed Transaction Demarcation 646
Client-Managed Transaction Demarcation 648
Concurrency and Isolation Levels 648
Concurrency and Locking 649
Optimistic Locking 650
Summary 653

Chapter 14 Processing XML Documents 655

Using XML and Java Together 656
Using the Document Object Model 657
DOM Level 2 Core Architecture 658
Offer Data As XML 664
Knowing When to Use the DOM 666
Using Simple API for XML (SAX) 668
SAX Architecture 668
Parsing Offer Data Using SAX 674
Properties and Features 676
Knowing When to Use SAX 677
Using Java API for XML Processing (JAXP) 677
DOM Pluggability 677
SAX Pluggability 681
Schema-Based Validation 683
Schema Source 684
Transformer Pluggability 685
Summary 694

Chapter 15 Introducing Enterprise Java Web Services 695

An Overview of the Example 696
An Overview of Web Services 697
Web Services Description Language 698
Simple Object Access Protocol 709
Web Services in J2EE 717
JAX-RPC Architectural Model 719
Java to WSDL Mapping 721
Servlet Endpoints 728
Service Endpoint Interface 728
Service Implementation Bean 729
Generate WSDL 731
Web Services Deployment Descriptor 732
Type Mapping Deployment Descriptor 735
Web Deployment Descriptor 736
Packaging and Deploying 737
Service Lifecycle 737
Web Service Clients 738
Static Stubs 739
Dynamic Proxies 741
Dynamic Invocation Interface 742
J2EE Clients 745
Working with SOAP Messages 747
EJB Endpoints 752
EJB Deployment Descriptor 752
Web Services Deployment Descriptor 753
Packaging and Deploying 754
Using Message Handlers 755
Usage Scenarios 755
Implementation 756
Deployment Process 760
Web Service Interoperability 760
Profiles 761
Summary 762

Chapter 16 Managing Applications, Components, and Resources 763

Using Java Management Extensions 764
- JMX Architecture 766
- MBean Server 767
- Instrumentation Level 783
- Notification Infrastructure 823

Agent-Level Services 829

Introducing the J2EE Management Specification 830
- Information Model 830
- Management EJB 834
- Statistics, Events, and State 836

Summary 840

Chapter 17 Packaging and Deploying Your Applications 841

Understanding J2EE Platform Roles 842
- Product Provider 843
- Application Component Provider 843
- Application Assembler 843
- Deployer 844
- System Administrator 844
- Tool Providers 844
- System Component Providers 844

Understanding the J2EE Packaging Model 845
- What Can Be Packaged? 846
- Application Deployment Descriptor 848

Configuring a Component's Environment 852
- Environment Entries 853
- EJB References 855
- Resource Factory References 858
- Resource Environment References 861
- Message Destination Reference 862

Resolving Dependencies 863
- Classloaders in Java 863
- Classloading Example 864
- Installed Extensions 868

Summary 868

Index 869
